Read the operating instructions carefully before using the appliance and follow the instructions for safe operation.

Handling of Operating Instructions

- PHC Corporation never guarantees any safety if the appliance is used for any objects other than intended use or used by any procedures other than those mentioned in the operating instructions.
- Keep the operating instructions in an adequate place to refer to it as necessary.
- Contact our sales representative or agent if any page of the operating instructions is lost or page order is incorrect.
- Contact our sales representative or agent if any point in the operating instructions is unclear or if there are any inaccuracies.
  - The operating instructions is only for the pharmaceutical refrigerator MPR-N450FSH and MPR-N450FH made by PHC Corporation.
  - The contents are subject to change without notice.
  - No part of the operating instructions may be reproduced in any form without the expressed written permission of PHC Corporation.

Proposal for safe storage of freezer contents

This equipment is designed for storage of pharmaceuticals, samples and reagents. We can offer some precautions below to protect the valuable material against accidental temperature rise. Contact our sales representative or agent for the details or installation.

- Temperature recorder (Option)
- Battery kit for power failure alarm (Option)
- Remote alarm system (Marketed product)

IMPORTANT NOTICE

PHC Corporation guarantees this product under certain warranty conditions. However, please note that PHC Corporation shall not be responsible for any loss or damage to the contents of the product.
It is imperative that the user complies with the operating instructions as they contain important safety advice.

Items and procedures are described so that you can use this unit correctly and safely. Following these precautions will prevent possible injury to the user and any other person.

Precautions are illustrated in the following way:

**WARNING**

Warning indicates a potentially hazardous situation which, if not avoided, could result in serious injury or death.

**CAUTION**

Failure to observe CAUTION signs could result in injury to personnel and damage to the unit and associated property.

Symbols have the following meanings:

- △ This symbol means caution.
- ☓ This symbol means an action is prohibited.
- ● This symbol means an instruction must be followed.

Be sure to keep the operating instructions in a place that is accessible to users of this unit.

For the State of California, USA Only:
This product contains a CR Coin Cell Lithium Battery which contains Perchlorate Material – special handling may apply. See www.dtsc.ca.gov/hazardouswaste/perchlorate.
Never damage the power supply cord or power supply plug (by breaking, adapting, placing near a source of heat, bending with force, twisting, pulling, adding weight, or binding). A damaged power supply cord or power supply plug may cause electric shock, short circuit, or fire.

Remove dust from the power supply plug periodically. Dust on the power supply plug may cause insulation failure due to moisture and thus cause a fire. Disconnect the power supply plug and wipe it with a dry cloth.

Make sure the power supply plug is pushed fully in. Faulty insertion of the power supply plug may cause electric shock or fire due to generation of heat. Never use a damaged power supply plug or loose power outlet.

Do not touch any electrical parts (such as power supply plug) or operate switches with a wet hand. This may cause electric shock.

Use a dedicated power source as indicated on the rating label attached to the unit. A multiple-tap may cause fire resulting from abnormal heating.

Do not use the unit outdoors. Exposure to rain may cause leakage and/or electric shock.

Only qualified engineers or service personnel should install the unit. Installation by unqualified personnel may cause water leakage, electric shock, or fire.

Install the unit in a location capable of bearing the total combined weight (product + optional accessories + stored items). After installing the unit, be absolutely sure to take precautions to prevent the unit from falling over. If the unit is installed in a location which is not strong enough or if the proper precautions are not taken, the unit may fall over and cause injuries.

Do not install the unit in a location where flammable or volatile substances are present. Installing the unit in a location where flammable or volatile substances are present may cause explosions and/or a fire.

Do not install the unit where there are high levels of moisture or where it may be splashed with water. Installing the unit where there are high levels of moisture or where it may be splashed with water may cause the insulation to deteriorate and give rise to leakage and/or electric shock.

Be absolutely sure to earth (ground) the unit in order to prevent electric shock. Failure to earth the product may give rise to electric shock. If necessary, ask a qualified contractor to do this work.

Do not connect the earth wire to a gas pipe, water pipe, or lightning rod when earthing the unit. Earthing the unit improperly may give rise to electric shock.
Never store volatile or flammable substances in this unit except in a sealed container. Such substances may cause explosion or fire if they leak.

Never insert metal objects such as pins and wires into any vent, gap, or outlet on the unit. This may cause electric shock or injury by accidental contact with moving parts.

When handling harmful samples (for example, those which consist of toxic, pathogenic, or radioactive substances), install the unit inside a designated isolation facility. If the unit is installed in a location which is not an isolation facility, there may be detrimental effects on both people and the natural environment.

Before proceeding with maintenance or checking of the unit, set the power switch to OFF and disconnect the power supply plug. Performing the work while power is still flowing to the product or while the power supply plug is still connected may give rise to electric shock and/or injury.

Wear protective gloves and mask during maintenance. Touching or inhaling chemicals or aerosols from around the unit may be detrimental to health.

Never splash water directly onto the unit as this may cause electric shock or short circuit.

Never put containers with liquid on top of the unit as this may cause electric shock or short circuit if the liquid is spilled.

Never disassemble, repair, or modify the unit yourself. A high-voltage area is located inside the unit. Any work carried out by unauthorized personnel may result in electric shock. Contact our sales representative or agent for maintenance or repair.

Disconnect the power supply plug if there is anything wrong with the unit. Continued abnormal operation may cause electric shock or fire.

Grip the power supply plug when disconnecting the power supply cord from the outlet. Pulling the power supply cord may cause electric shock or short circuit.

Disconnect the power supply cord when the unit is not in use for long periods. Keeping the unit connected may cause electric shock, leakage, or fire due to the deterioration of insulation.

Do not place this unit in a location where it is difficult to disconnect the power supply plug. Failure to disconnect the power supply plug may cause fire in the event of a problem or malfunction.

If the unit is to be stored unused in an unsupervised area for a long period, ensure that children do not have access and that doors cannot be closed completely.
PRECAUTIONS FOR SAFE OPERATION

WARNING

Ask a qualified contractor to carry out disassembly and disposal of the unit. Leaving the unit in a location that can be accessed by third parties may result in unexpected accidents (e.g. the unit may be used for unintended purposes).

Do not leave the plastic bags used for packing in a place where they can be reached by small children as this may result in unexpected accidents such as suffocation.

When moving the unit, be sure to take precautions to prevent it from falling over. Moving the unit with too much force may cause it to fall over, possibly resulting in injury. A qualified individual must be assigned to supervise the safe movement and relocation of the unit.

Do not install the unit in a location where corrosive gases such as acids are present. Installing the unit in a location where corrosive substances are present may cause electric components to corrode, leading to leakage and/or electric shock due to the deterioration of insulation resulting from corroded electrical components.

Connect the unit to a power source as indicated on the rating label attached to the unit. Use of any other voltage or frequency other than that on the rating label may cause fire or electric shock.

Wear protective gloves when handling frozen items in the chamber. Touching frozen items directly may cause frostbite.

Always use the removal power supply cord that is provided. Other power supply cord may cause electric shock or fire.

Never damage the chamber wall or pipework in the chamber when removing frost. The refrigerant is flammable and may cause a fire if it leaks.

Install the unit in a well-ventilated (airy) location to prevent the accumulation of flammable refrigerant. The flammable refrigerant may cause fire if it leaks.

Flammable and explosive product. The unit contains flammable refrigerant. When repairing or recycling, only trained service personnel will repair and follow the procedure below.

- Well ventilate the room to prevent refrigerant accumulation.
- Keep fire away when the refrigerant is contained in the product.
- Do not damage or break the pipework.

Stop using the fire, open the windows for ventilation, and leave the unit as it is if the pipework is damaged or the leakage of flammable refrigerant is noticed. Then contact our sales representative or agent. Disconnection or connection of the power supply plug may cause ignition, explosion, or fire.
PRECAUTIONS FOR SAFE OPERATION

⚠️ CAUTION

🚫 Do not climb on top of the unit or put any objects on the unit. Falling from the unit may cause injury; falling objects may cause damage to the unit.

🚫 Never install the unit in a location where corrosive materials such as sulphur compounds are likely to be generated (e.g. near a drainage facility). Corrosion of the copper pipes may result in the deterioration and consequently the failure of the cooling unit.

🚫 Before resuming operation after the unit has been turned off, be absolutely sure to check the settings. The settings may have changed as a result of stopping the unit. Items stored inside the unit may be adversely affected if operation of the unit is resumed with changed settings.

🚫 Never store corrosive substances such as acids or alkalis in the unit except in a sealed container. These may be detrimental to health and may cause corrosion of internal components, cooling circuit or electrical components.

🚫 Do not damage the glass or give it a shock. The shelves in the refrigerator are tempered glass, but they can be broken or cause injury if they are used incorrectly.

⚠️ To ensure the safety of the service engineer, submit a safety check sheet with the required items filled out. This is provided as the photocopiable “Safety Check Sheet” at the end of these operating instructions.
This equipment is designed to be safe at least under the following conditions (based on the IEC 61010-1):

- Indoor use;
- Altitude up to 2000 m;
- Temperature 5 °C to 40 °C;
- Maximum relative humidity 80 % for temperature up to 31 °C decreasing linearly to 50 % relative humidity at 40 °C;
- Mains supply voltage fluctuations up to ±10 % of the nominal voltage;
- Transient overvoltages up to the levels of OVERVOLTAGE CATEGORY II;
- Temporary OVERVOLTAGES occurring on the mains supply;
- Applicable pollution degree of the intended environment (POLLUTION DEGREE 2 in most cases);
The following symbols are attached to the unit. The table describes the meaning of the symbols.

<table>
<thead>
<tr>
<th>Symbol</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>⚠️</td>
<td>This symbol is attached to covers that access high-voltage electrical components to prevent electric shock. Only a qualified engineer or service personnel should be allowed to open these covers.</td>
</tr>
<tr>
<td>⚠️</td>
<td>This symbol indicates that caution is required. Refer to product documentation for details.</td>
</tr>
<tr>
<td>🔥</td>
<td>This symbol indicates incorrect usage could lead to a fire hazard.</td>
</tr>

MPR-N450FH
1. **Air intake vent:** This is an air intake vent for circulating the air in the chamber. Do not block this vent. ✡ Blocking this vent may cause unstable chamber temperature.

2. **Control panel:** The chamber temperature and other alarms/functions can be set using the keys on the control panel. The operational status can be checked on the temperature display and indicator [page 14].

3. **Access port:** This port is used to pass the sensor or cable of measuring equipment, or the sensor of a temperature recorder (optional) to the chamber.
   ✡ Replace the insulation and the rubber caps when the access port is not in use. Improper replacement may cause an increase in chamber temperature or condensation around the access port.

4. **Bottom shelf:** Always put this shelf on the bottom of the freezer to protect the storage items.

5. **Power switch(also functions as a circuit breaker) :** This is the power switch of the unit. (ON=" | ", OFF="O")
   ✡ The round button under the power switch is a test button for the circuit breaker. After pressing this button, the power to the unit is disconnected.

6. **Remote alarm terminal (inside):** A remote alarm device (separately available) can be connected to this terminal. The remote alarm relays the alarm to an operator in a remote location if the unit is unattended.
   ✡ Contact our sales representative or agent to arrange the installation.

7. **Leveling foot (front):** These are screw bolts used to install and fix the unit. Adjust the height of the levelling feet by turning the screw bolts until the two front casters are away from the floor [page 16].

8. **Space for temperature recorder:** A temperature recorder (optional) can be mounted here so that the chamber temperature can be recorded automatically [page 64].
   ✡ Contact our sales representative or agent to arrange the installation.

9. **Drain hose cap:** This is used to drain the defrost water in the freezer chamber at the time of defrosting. The drain hose is accessible by removing the drain hose cap [page 57].
   ✡ Always replace the drain hose cap after draining.

10. **Drain port:** This port is used to drain the defrost water in the freezer chamber.
    ✡ Always replace the port cap after draining.

11. **Air exhaust vent (around the interior light):** This is an air exhaust vent for circulating the air in the chamber. Do not block this vent.
    ✡ Blocking this vent may cause unstable chamber temperature.

12. **Glass shelf:** This is made of tempered glass, but do not add the excessive force.

13. **Defrost indicator (small red projection):** Remove the frost in the freezer when this indicator is covered with the frost [page 57].
REFRIGERATOR COMPONENTS

Control panel

① **LED indicator:** In normal operation, the green LED lamp lights up, and during alarm condition, the red LED lamp blinks to indicate alarm.

② **Temperature display:** The present chamber temperature, log chart, or input screen, etc. are displayed.

③ **Up/down/left/right key (△▽ ◄►):**
   - On the “home screen (temperature display screen)”: pressing this key changes the display.
   - On the screen “other than the home screen”: pressing this key moves the cursor, etc.

④ **Menu key (MENU/HOME):**
   - On the “home screen (temperature display screen)”: pressing this key leads the menu screen. It is possible to set various settings on the menu screen.
   - On the screen “other than the home screen”: pressing this key leads the home screen.

⑤ **Cancel key (CANCEL):** On the setting screen, pressing this key changes into the screen of one level up.

⑥ **USB port:** Insert a USB memory device to export data logs.
   - Do not insert anything other than a USB memory device.

⑦ **Buzzer stop key (BUZZER STOP):** The buzzer is silenced by pressing this key when the buzzer sounds.

⑧ **Enter key (ENTER):** Press this to select the menu item. Press this key to enter the required value during the setting procedure.
This unit must be installed in a location which meets all the conditions described below. If the unit is installed in a location which does not meet the conditions, its specified performance may not be achieved or malfunctions and accidents may occur.

- **A location not exposed to direct sunlight**
  Avoid any location which is exposed to direct sunlight. Installing the unit in a location exposed to direct sunlight may reduce its cooling performance.

- **A well-ventilated (airy) location**
  In order to ensure ventilation, leave clearances of at least 10 cm around the unit (at the left, right, top and back). Blocking the ventilation may reduce the unit’s cooling performance or cause malfunctions.

- **A location away from sources of heat**
  Avoid any location which is close to a major source of heat (such as a heater or boiler). Installing the unit near a major source of heat may reduce the unit’s cooling performance.

- **A location with minimal changes in temperature**
  Avoid any location where the ambient temperature is subject to sudden changes. If the unit is installed in a location where the ambient temperature is subject to sudden changes, it will not be possible to achieve a stable cooling performance.

- **A flat surface where the floor is also capable of bearing the total combined weight (product + optional accessories + stored items)**
  Install the unit on a flat surface which is even and which is capable of bearing the total combined weight (product + optional accessories + stored items). If the unit is installed where the surface is uneven or where the unit will be inclined at an angle, the unit will be unstable, and accidents or injuries may occur and/or vibration or unnecessary noise may be generated.

- **A location with minimal humidity**
  Install the unit in a location where the relative humidity is less than 80 %R.H. Installing the unit in a very humid location may cause earth faults and/or electric shock.

- **A location free of flammable or corrosive gases**
  Avoid any location exposed to flammable or corrosive gases. Flammable or corrosive gases can cause explosions and/or a fire. Furthermore, corrosion of electrical parts may cause insulation to be reduced and result in earth faults and/or electric shock.

- **A location where nothing can fall onto the unit**
  Avoid locations where objects may fall onto the unit. Objects falling and hitting the unit may cause it to break down or fail.
1. Preparations after unpacking
Remove all the tape used to secure the doors and interior parts, and leave the doors open for a short while for ventilation.
If any surfaces of the outer cabinet are dirty, wipe the surface using a cloth moistened with a diluted neutral dish-washing detergent.
 Using an undiluted solution of detergent may cause the unit’s plastic areas to crack. Follow the directions on the detergent for details of dilution.
 After wiping the unit using the diluted detergent, be absolutely sure to wipe the surfaces with a cloth dipped in clean water to remove traces of the detergent. After this, be absolutely sure to wipe the surfaces with a dry cloth, allowing the surfaces of the outer cabinet to dry out completely, and then proceed with the installation.
Note:
Remove the cable tie that binds the power supply cord. Prolonged contact with the tie may cause corrosion of the cord coating.

2. Securing and levelling the unit using the levelling feet
Rotate the front levelling feet clockwise until the casters are raised 5 mm to 10 mm above the floor surface [Fig. 1].
In addition, rotate the levelling feet slightly clockwise or anticlockwise, and adjust them so that the unit is completely level.
 When the casters are raised from the floor surface, the unit will be secured. If they are left touching the floor, the unit may accidently move when its door is opened or closed.

3. Securing the unit by using the fixtures
Use the fixtures on the rear panel of the unit, and secure the unit to a wall with a strong rope or chain [Fig. 2].

4. Preventing electric shock by earthing the unit
When installing the unit, be absolutely sure to earth (ground) it. Earthing is necessary to prevent electric shocks resulting from deterioration of electrical insulations.
 This unit comes with a 3-pin plug having one earth pin. Earthing is not required in the case of a 3-pin power outlet equipped with an earth contact.
 If the power outlet is not a 3-pin outlet equipped with an earth contact, ask a qualified contractor to do the earthing work.
START-UP PROCEDURE

Follow this procedure for the initial operation of the unit and for consequent operations (after temporary stoppage for cleaning, maintenance or moving).

After a power failure, the unit will restart operation automatically with the same settings as before the power failure.

1. Connect the power supply cord to the dedicated power source with the appropriate rating with the chamber empty, and turn on the power switch.
   ►When the power is switched on, the home screen (temperature display screen) is displayed. The red LED indicator blinks. (This is caused by the high-temperature alarm function and is not a malfunction.)

2. Set the date and time displayed on the temperature display to the current date and time [pages 51 to 53].

3. Set the desired chamber temperature [page 21].
   ◆The factory setting of refrigerator chamber temperature is 5 °C and the freezer chamber temperature is -30 °C.

4. Using the temperature display, check that the chamber temperature has cooled to the set temperature.

5. Open the refrigerator door to check that the interior light is on.

6. Gradually place the material inside the chamber.
   ◆Putting a large amount of material into the chamber at one time causes the temperature to rise.
   ◆Do not block the air intake vent nor air exhaust vent in the refrigerator chamber.
   <Important>
   The “load line” is indicated in the refrigerator chamber. Do not put materials on the location higher than the “load line”.
   ◆The air flow is blocked and the cooling performance is degraded.

7. Set a selectable parameter (keypad lock, alarm temperature, delay of door alarm buzzer, etc.) as required [page 20].

<Important>
This unit is for storing items and do not use for other application.

<Attention>
The condensation may be found on the glass of refrigerator door under high temperature and humidity condition. Wipe off the condensation with a soft dry cloth (for MPR-N450FH).

AFTER RECOVERY FROM POWER FAILURE

After recovery from a power failure, the operation will resume automatically with the same settings as before the power failure. There is no need to re-set. However, always check the operational status after recovery.

◆The settings are memorized during power failure by nonvolatile memory.
When the power is switched on, the following home screen (temperature display screen) is displayed.

Following shows the integer display mode.

By pressing the right/left key (▷◁), the temperature display is changed between “refrigerator & freezer temperature display”, “refrigerator temperature display”, and “freezer temperature display”.

<Change of display mode>
On the home screen, the temperature display is selectable; integer display mode or decimal display mode.

Following shows an example of decimal representation mode.

Also in the decimal representation mode, by pressing the right/left key (▷◁), the temperature display is changed between “refrigerator & freezer temperature display”, “refrigerator temperature display”, and “freezer temperature display”.

In both the integer display and decimal display, refrigerator temperature and freezer temperature are displayed repeatedly at certain interval when there is no key operation (sleeping mode).
The menu screen is displayed by pressing the menu key (MENU/HOME) while the home screen (temperature display screen) is displayed. Following shows the menu screen.

1. Cursor
   This is used for selecting the menu. The cursor moves by pressing the up/down key (△▽).

2. Refrigerator set temperature
   Select this menu when changing the refrigerator set temperature. Moving the cursor to this menu and pressing the enter key (ENTER) lead the screen for setting the refrigerator temperature.

3. Freezer set temperature
   Select this menu when changing the freezer set temperature. Moving the cursor to this menu and pressing the enter key (ENTER) lead the screen for setting the freezer temperature.

4. Keypad lock
   Select this menu to set the keypad lock. Moving the cursor to this menu and pressing the enter key (ENTER) lead the screen for setting the keypad lock.
   The setting can be locked to avoid accidental changes. When the keypad lock is ON, a change of setting is not accepted even if the key on the control panel is operated.

5. Temp. Max / Min
   Select this menu to check the maximum or minimum chamber temperature (refrigerator or freezer) during every 12 hours or 24 hours. Moving the cursor to this menu and pressing the enter key (ENTER) lead the screen for selecting the maximum or minimum temperature display.

6. Data Log
   Select this menu to display the log on the screen or export the log to a USB memory device. Moving the cursor to this menu and pressing the enter key (ENTER) lead the “Data Log” screen.

7. Alarms & Controls
   Select this menu to set the high/low temperature alarm, or other parameters. Moving the cursor to this menu and pressing the enter key (ENTER) lead the “Alarms & controls” screen.

8. Display of setting temperature of refrigerator chamber

9. Display of setting temperature of freezer chamber
Following shows the screen display and function at each screen under Menu level.

**Note:** The unit will return from setting mode to the home screen automatically after 90 seconds if no key is operated (auto-return function). In this case, the setting is not changed.

SETTING THE CHAMBER TEMPERATURE

Set the chamber temperature as required to keep the stored material at an appropriate temperature for a long period of time.

<Setting the refrigerator temperature>

- Setting range of chamber temperature: between 2 °C and 14 °C
- Initial setting (factory setting): 5 °C

1. On the home screen, press the menu key (MENU/HOME).
   ▶ The Menu screen is displayed [Fig. 1].

2. With the cursor on the Ref. Set Temp., press the enter key (ENTER).
   ▶ The Ref. Set Temp. screen is displayed, and the current setting (05) is displayed [Fig. 2].

3. By pressing the right or left key, move the cursor to select the digit to be changed. Then change the figure by pressing the up or down key.

4. Press the enter key (ENTER).
   ▶ The setting is memorized and the screen is changed to the Menu screen.

5. Press the menu key (MENU/HOME) to display the home screen.
   ◊ The display returns to the home screen automatically when 90 seconds has passed without any key operation.

<Setting the freezer temperature>

- Setting range of chamber temperature: between -35 °C and -15 °C
- Initial setting (factory setting): -30 °C

1. On the home screen, press the menu key (MENU/HOME).
   ▶ The Menu screen is displayed [Fig. 1].

2. Move the cursor to the Fzr. Set Temp. by pressing the up or down key [Fig. 3], and press the enter key (ENTER).
   ▶ The Fzr. Set Temp. screen is displayed, and the current setting (-30) is displayed [Fig. 4].

3. By pressing the right or left key, move the cursor to select the digit to be changed. Then change the figure by pressing the up or down key.
   ◊ The freezer operation stops when -00 is set, select OFF by pressing the down key and then press the enter key (ENTER). On the temperature display, -- is displayed. The freezer temperature is not displayed at the time of no key operation (sleeping mode).

4. Press the enter key (ENTER).
   ▶ The setting is memorized and the screen is changed to the Menu screen.

5. Press the menu key (MENU/HOME) to display the home screen.
   ◊ The display returns to the home screen automatically when 90 seconds has passed without any key operation.
SETTING THE KEYPAD LOCK

The setting can be locked to avoid accidental changes. When the keypad lock is ON, a change of setting is not accepted even if the key on the control panel is operated.

1. On the home screen, press the menu key (MENU/HOME).
   ►The Menu screen is displayed.

2. By pressing the up or down key, move the cursor to the Keypad Lock [Fig. 1] and then press the enter key (ENTER).
   ►The Keypad Lock ON/OFF screen is displayed, and the current setting (OFF) is displayed [Fig. 2].

3. By pressing the up or down key, change the setting to ON.
   ♦The setting is changed to ON or OFF when the up or down key is pressed.

4. Press the enter key (ENTER).
   ►The Keypad Lock PW screen is displayed [Fig. 3].

5. Input the password (6 digits) and press the enter key (ENTER).
   ►The Confirm PW screen is displayed [Fig. 4].

6. Again input the password (6 digits) and press the enter key (ENTER).
   ►The display returns to the Menu screen and LOCK is displayed on the upper right [Fig. 5].

Note: The following screen will be displayed when the second password does not comply with the first password.

By pressing any key on the control panel, the display returns to the Menu screen. Start from the above procedure 2.

7. Press the menu key (MENU/HOME) to display the home screen.
   ♦The display returns to the home screen automatically when 90 seconds has passed without any key operation.
When the keypad lock is OFF, a change of setting is acceptable.

1. On the home screen, press the menu key (MENU/HOME).
   ►The Menu screen is displayed.

2. By pressing the up or down key, move the cursor to the Keypad Lock [Fig. 1] and then press the enter key (ENTER).
   ►The Keypad Lock ON/OFF screen is displayed, and the current setting (ON) is displayed [Fig. 2].

3. By pressing the up or down key, change the setting to OFF.
   ◦The setting is changed to ON or OFF when the up or down key is pressed.

4. Press the enter key (ENTER).
   ►The Keypad Lock PW screen is displayed [Fig. 3].

5. Input a password (6 digits) and press the enter key (ENTER).
   ►The display returns to the Menu screen and LOCK on the upper right is disappeared [Fig. 4].

Note: The following screen will be displayed when the password does not comply with the set password.

By pressing any key on the control panel, the display returns to the Menu screen. Start from the above procedure 2.

6. Press the menu key (MENU/HOME) to display the home screen.
   ◦The display returns to the home screen automatically when 90 seconds has passed without any key operation.
DISPLAY OF MAX/MIN TEMPERATURE

On the temperature display, the maximum and minimum chamber temperature for every 24 or 12 hours can be checked.

- Initial setting (factory setting): 24 hours

1. On the home screen, press the menu key (MENU/HOME).
   ► The Menu screen is displayed.

2. By pressing the up or down key, move the cursor to the Temp. Max/Min [Fig. 1] and then press the enter key (ENTER).
   ► The Temp. Max/Min screen is displayed [Fig. 2].

<Display of maximum and minimum refrigerator temperature>
3. With the cursor on the Ref. Temp. Max/Min [Fig. 2], press the enter key (ENTER).
   ► The Ref. Temp. screen is displayed, and the maximum and minimum refrigerator temperature are displayed [Fig. 3].
   ◆ The display on the top (03/01 12:00) shows the start date and time of the monitor period (for 24 or 12 hours). The start date is March 1 and time is 12:00.

4. Press the menu key (MENU/HOME) to display the home screen.
   ◆ The display returns to the home screen automatically when 90 seconds has passed without any key operation.

<Display of maximum and minimum freezer temperature>
3. By pressing the up or down key, move the cursor to the Fzr. Temp. Max/Min [Fig. 4] and then press the enter key (ENTER).
   ► The Fzr. Temp. screen is displayed, and the maximum and minimum freezer temperature are displayed [Fig. 5].
   ◆ The display on the top (03/01 12:00) shows the start date and time of the monitor period (for 24 or 12 hours).

4. Press the menu key (MENU/HOME) to display the home screen.
   ◆ The display returns to the home screen automatically when 90 seconds has passed without any key operation.
The maximum and minimum chamber temperature can be reset.

1. On the home screen, press the menu key (MENU/HOME).
   ▶ The Menu screen is displayed.

2. By pressing the up or down key, move the cursor to the Temp. Max/Min [Fig. 1] and then press the enter key (ENTER).
   ▶ The Temp. Max/Min screen is displayed [Fig. 2].

<Reset of maximum and minimum refrigerator temperature>
3. By pressing the up or down key, move the cursor to the Ref. Temp. Reset [Fig. 3] and then press the enter key (ENTER).
   ▶ The Ref. Temp. Reset screen is displayed, and the current setting (NO) is displayed [Fig. 4].

4. By pressing the up or down key, change the setting to YES.
   ▷ The setting is changed to NO or YES when the up or down key is pressed.

5. Press the enter key (ENTER).
   ▶ The setting is memorized and the screen is changed to the Temp. Max/Min screen.

6. Press the menu key (MENU/HOME) to display the home screen.
   ▷ The display returns to the home screen automatically when 90 seconds has passed without any key operation.

<Reset of maximum and minimum freezer temperature>
3. By pressing the up or down key, move the cursor to the Fzr. Temp. Reset [Fig. 5] and then press the enter key (ENTER).
   ▶ The Fzr. Temp. Reset screen is displayed, and the current setting (NO) is displayed [Fig. 6].

4. By pressing the up or down key, change the setting to YES.
   ▷ The setting is changed to NO or YES when the up or down key is pressed.

5. Press the enter key (ENTER).
   ▶ The setting is memorized and the screen is changed to the Temp. Max/Min screen.

6. Press the menu key (MENU/HOME) to display the home screen.
   ▷ The display returns to the home screen automatically when 90 seconds has passed without any key operation.
The period for monitoring the maximum and minimum chamber temperature is selectable. The monitor period is 24 hours or 12 hours.
The maximum and minimum chamber temperature for 24 hours are displayed when 24 hours is selected.
The maximum and minimum chamber temperature for 12 hours are displayed when 12 hours is selected.

- Initial setting (factory setting): 24 hours

1. On the home screen, press the menu key (MENU/HOME).
   ►The Menu screen is displayed.

2. By pressing the up or down key, move the cursor to the Temp. Max/Min [Fig. 1] and then press the enter key (ENTER).
   ►The Temp. Max/Min screen is displayed.

3. By pressing the up or down key, move the cursor to the Max/Min Interval [Fig. 2] and then press the enter key (ENTER).
   ►The Max/Min Interval screen is displayed, and the current setting (24H) is displayed [Fig. 3].

4. By pressing the up or down key, change the setting to 12H.
   ◇The setting is changed to 24H or 12H when the up or down key is pressed.

5. Press the enter key (ENTER).
   ►The setting is memorized and the screen is changed to the Temp. Max/Min screen.

6. Press the menu key (MENU/HOME) to display the home screen.
   ◇The display returns to the home screen automatically when 90 seconds has passed without any key operation.
Display & export of temp. and door operation logs

The log of chamber temperature (refrigerator and freezer) and door operation (refrigerator and freezer) can be displayed by chart on the screen. Also, those logs can be exported to a USB memory device.

1. On the home screen, press the menu key (MENU/HOME).
   ► The Menu screen is displayed.

2. By pressing the up or down key, move the cursor to the Data Log [Fig. 1] and then press the enter key (ENTER).
   ► The Data Log screen is displayed [Fig. 2].

3. With the cursor on the Data Log Chart [Fig. 2], press the enter key (ENTER).
   ► The R. Temp. screen (chart of refrigerator temperature) is displayed [Fig. 3].

4. With the highlighted R. Temp. displayed on upper left [Fig. 3], press the enter key (ENTER).
   ► The Data Select screen is displayed [Fig. 4].

5. By pressing the up or down key, select the data item to be displayed.
   ♦ The setting is changed to R. TEMP., F. TEMP., or DOOR when the up or down key is pressed.
   R. TEMP.: Log of refrigerator temperature
   F. TEMP.: Log of freezer temperature
   DOOR: Log of door operation (refrigerator door and freezer door)

6. Press the enter key (ENTER).
   ► The log is displayed in chart.

   Note: In the case of freezer temperature chart, the temperature range can be changed by pressing the up or down key when the F. Temp. on upper left is highlighted [Fig. 5]. The initial setting is between -40 °C and 0 °C and the range is changed by 10 °C step by pressing the up or down key.

   <The chart of door operation logs (refrigerator and freezer)>

   F.OP: freezer door opened
   F.CL: freezer door closed

7. Press the right key with the data item (R. Temp., F. Temp. or Door) on upper left is highlighted [Fig. 5].
   ► The date is highlighted.
DISPLAY AND EXPORT OF DATA LOG

8. By pressing the up or down key, select the date of which data is displayed.
   ♦ The date is advanced or got back by one day when the up or down key is pressed, and the chart of the data for the selected date is displayed.
   Note: The Date Select screen is displayed [Fig. 6] when the enter key (ENTER) is pressed instead of the up or down key. Set the date by pressing the up or down key and right or left key.

9. Press the enter key (ENTER).
   ▶ The data for the selected date is displayed in chart.

<When exporting the data for the selected date to a USB memory device>

10. With the date is highlighted [Fig. 7], press the right key.
    ▶ EXP. on upper right is highlighted [Fig. 8].

11. Insert a USB memory device to the USB port.

12. Press the enter key (ENTER).
    ▶ The logs of chamber temperature (refrigerator and freezer) and door operation for the selected date are exported with CSV files. During exporting, Exporting…. is displayed.
    Note: The following message may be indicated.
    "USB memory is disconnected; this means a USB memory device is not inserted."
    "USB memory is full; this means there is no data space in a USB memory device."
    "No Data: this means there is no data to be exported."
    "An error occurred: this means the exporting is resulted in failure."
    ▶ The chart screen is displayed by pressing the enter key (ENTER).

13. Press any key on the control panel when the screen showing the completion of data exporting is displayed [Fig. 9].
    ▶ The chart screen is displayed.

14. Remove the USB memory device from the USB port.

15. Press the menu key (MENU/HOME) to display the home screen.
    ♦ The display returns to the home screen automatically when 90 seconds has passed without any key operation.
Export of temperature and door operation logs

All temperature logs (refrigerator and freezer) and door operation logs saved in a memory or log for a selected date (24 hours) can be exported to a USB memory device.

1. Insert a USB memory device to the USB port.

2. On the home screen, press the menu key (MENU/HOME).
   ► The Menu screen is displayed.

3. By pressing the up or down key, move the cursor to the Data Log [Fig. 1] and then press the enter key (ENTER).
   ► The Data Log screen is displayed.

4. By pressing the up or down key, move the cursor to the Data Log Export [Fig. 2] and then press the enter key (ENTER).
   ► The Data Log Export screen is displayed [Fig. 3].

5. With the cursor on the 24 Hours [Fig. 3], press the enter key (ENTER) when the log for a specified date is exported.
   ► The Date Select screen is displayed [Fig. 4].

6. By pressing the up, down, right or left key, set a date of which log is exported, and then press the enter key (ENTER).

7. The log for the set date is exported to the USB memory device.

Note: Select All in the above procedure 5 and press the enter key (ENTER) when all memorized logs are exported.

8. “Export complete” is displayed when the export is finished. By pressing the up, down, right or left key, the Data Log Export screen is displayed.

9. Remove the USB memory device from the USB port.

10. Press the menu key (MENU/HOME) to display the home screen.
    ◆ The display returns to the home screen automatically when 90 seconds has passed without any key operation.
Setting the log interval

The log interval for the chamber temperature (refrigerator and freezer) can be set.

- Setting range of log interval: between 1 minute and 15 minutes
- Initial setting (factory setting): 1 minute (log for approximately 3 months can be stored)

1. On the home screen, press the menu key (MENU/HOME).
   ►The Menu screen is displayed.

2. By pressing the up or down key, move the cursor to the Data Log [Fig. 1] and then press the enter key (ENTER).
   ►The Data Log screen is displayed.

3. By pressing the up or down key, move the cursor to the Data Log Setting [Fig. 2] and then press the enter key (ENTER).
   ►The Data Log Setting screen is displayed [Fig. 3].

4. With the cursor on the Data Log Interval [Fig. 3], press the enter key (ENTER).
   ►The Data Log Interval screen is displayed [Fig. 4].

5. By pressing the right or left key, select the digit to be changed and then change the figure by pressing the up or down key.

6. Press the enter key (ENTER).
   ►The setting is memorized and the screen is changed to the Data Log Setting screen.

7. Press the menu key (MENU/HOME) to display the home screen.
   ◊The display returns to the home screen automatically when 90 seconds has passed without any key operation.
Setting the device ID

The unique device ID indicated on the file exported to a USB memory device (CSV file) can be set.

- Setting range of device ID: 6-digit number and alphabet (capital letter only)
- Initial setting (factory setting): 000000

1. On the home screen, press the menu key (MENU/HOME).
   ►The Menu screen is displayed.

2. By pressing the up or down key, move the cursor to the Data Log [Fig. 1] and then press the enter key (ENTER).
   ►The Data Log screen is displayed.

3. By pressing the up or down key, move the cursor to the Data Log Setting [Fig. 2] and then press the enter key (ENTER).
   ►The Data Log Setting screen is displayed.

4. By pressing the up or down key, move the cursor to the Unique File ID [Fig. 3] and then press the enter key (ENTER).
   ►The Unique File ID screen is displayed [Fig. 4].

5. By pressing the right or left key, select the digit to be changed and then change the figure or alphabet by pressing the up or down key.

6. Press the enter key (ENTER).
   ►The setting is memorized and the screen is changed to the Data Log Setting screen.

7. Press the menu key (MENU/HOME) to display the home screen.
   ◇The display returns to the home screen automatically when 90 seconds has passed without any key operation.
DISPLAY OF ALARM LOG

The alarm log can be displayed on the screen. Following shows the format of the indication.

1. Display area for alarm log
One alarm log is displayed in two lines and three alarm logs can be displayed on the screen. The upper line shows a date and time when an alarm detected, and an error code. The lower line shows an error message.

2. Up scroll mark
By pressing the up key, the later alarm log is displayed when the up scroll mark is displayed.

3. Down scroll mark
By pressing the down key, the previous alarm log is displayed when the down scroll mark is displayed.

1. On the home screen, press the menu key (MENU/HOME).
   ► The Menu screen is displayed.

2. By pressing the up or down key, move the cursor to the Data Log [Fig. 1] and then press the enter key (ENTER).
   ► The Data Log screen is displayed [Fig. 2].

3. By pressing the up or down key, move the cursor to the Alarm [Fig. 2] and then press the enter key (ENTER).
   ► The Alarm screen is displayed [Fig. 3].

4. Press the menu key (MENU/HOME) to display the home screen.
   ◊ The display returns to the home screen automatically when 90 seconds has passed without any key operation.
The alarm log for the selected date or all alarm logs saved in the memory can be exported to a USB memory device in CSV file.

1. Insert a USB memory device to the USB port.

2. On the home screen, press the menu key (MENU/HOME). ▶The Menu screen is displayed.

3. By pressing the up or down key, move the cursor to the Data Log [Fig. 1] and then press the enter key (ENTER). ▶The Data Log screen is displayed.

4. By pressing the up or down key, move the cursor to the Alarm Export [Fig. 2] and then press the enter key (ENTER). ▶The Alarm Export screen is displayed [Fig. 3].

5. With the cursor on the 24 Hours [Fig. 3], press the enter key (ENTER) when the alarm log for a specified date is exported. ▶The Date Select screen is displayed [Fig. 4].

6. By pressing the up, down, right or left key, set a date of which alarm log is exported, and then press the enter key (ENTER).

7. The alarm log for the set date is exported to the USB memory device.

Note: Select All in the above procedure 5 and press the enter key (ENTER) when all memorized alarm logs are exported.

8. “Export complete” is displayed when the export is finished. By pressing the up, down, right or left key, the Alarm Export screen is displayed.

9. Remove the USB memory device from the USB port.

10. Press the menu key (MENU/HOME) to display the home screen. ◾The display returns to the home screen automatically when 90 seconds has passed without any key operation.
The setting of some parameters (including the alarm setting) can be changed. Following shows the selectable parameters. Refer to the following pages for the details.

1/10 Temp. Display
The temperature display format on the home screen is selectable; integer display or decimal display.

Freezer Setting
The setting is changed when the freezer operation is stopped for defrosting. Also, ON/OFF of freezer alarm is selectable.

Alarm Setting #1
The selectable parameters; high temperature alarm and low temperature alarm of refrigerator, high temperature alarm and low temperature alarm of freezer.

Alarm Setting #2
The selectable parameters; delay of door alarm buzzer, buzzer suspended period, buzzer volume, remote alarm.

Interior Light
The setting of interior light; linked with the door operation, always ON or always OFF.

Comp. Delay
The delay time of compressor start after recovery form the power failure is selectable.

DAQ Setting
The selectable parameters; device ID for data acquisition, communication speed of data acquisition, remote control.

Date & Time
The selectable parameters; setting of date and time, and format of date/time indication “YY/MM/DD” or “DD/MM/YY”
### Setting the temperature display

1. On the home screen, press the menu key (MENU/HOME).
   ► The Menu screen is displayed.

2. By pressing the up or down key, move the cursor to the Alarms & Controls [Fig. 1] and then press the enter key (ENTER).
   ► The Alarms & Controls screen is displayed [Fig. 2].

3. With the cursor on the 1/10 Temp. Display [Fig. 2], press the enter key (ENTER).
   ► The 1/10 Temp. Display screen is displayed [Fig.3].

4. The setting is changed to the integer display (00°C) or decimal display (00.0°C) when the up or down key is pressed.

5. Press the enter key (ENTER).
   ► The setting is memorized and the screen is changed to the Alarms & Controls screen.

6. Press the menu key (MENU/HOME) to display the home screen.
   ◇ The display returns to the home screen automatically when 90 seconds has passed without any key operation.
Setting the freezer defrosting

Stop the freezer operation according to the procedure below when removing the frost in the freezer chamber.

Arrows refer to page 57 for the freezer defrosting.

1. On the home screen, press the menu key (MENU/HOME).
   ►The Menu screen is displayed.

2. By pressing the up or down key, move the cursor to the Alarms & Controls [Fig. 1] and then press the enter key (ENTER).
   ►The Alarms & Controls screen is displayed.

3. By pressing the up or down key, move the cursor to the Freezer Setting [Fig. 2] and then press the enter key (ENTER).
   ►The Freezer Setting screen is displayed [Fig. 3].

4. With the cursor on the Fzr. Defrost ON/OFF [Fig. 3], press the enter key (ENTER).
   ►The Fzr. Defrost ON/OFF screen is displayed, and the current setting (OFF) is displayed [Fig. 4].

5. By pressing the up or down key, change the setting to ON.
   ►The setting is changed to ON or OFF when the up or down key is pressed.

6. Press the enter key (ENTER).
   ►The setting is memorized and the screen is changed to the Freezer Setting screen. At the same time, the freezer operation stops (defrosting by operation stop).

   Note: When starting the freezer operation, change the setting to ON in the above procedure 5 and then press the enter key (ENTER).

7. Press the menu key (MENU/HOME) to display the home screen.
   ►DEF is displayed on the freezer temperature screen.
   ►The display returns to the home screen automatically when 90 seconds has passed without any key operation.
Setting the freezer alarm buzzer

The high-temperature alarm will be kept for long period when freezing the ice packs. In this case, silence the buzzer by the following procedure.

1. On the home screen, press the menu key (MENU/HOME).
   ►The Menu screen is displayed.

2. By pressing the up or down key, move the cursor to the Alarms & Controls [Fig. 1] and then press the enter key (ENTER).
   ►The Alarms & Controls screen is displayed.

3. By pressing the up or down key, move the cursor to the Freezer Setting [Fig. 2] and then press the enter key (ENTER).
   ►The Freezer Setting screen is displayed.

4. By pressing the up or down key, move the cursor to the Fzr. Alarm ON/OFF [Fig. 3] and then press the enter key (ENTER).
   ►The Fzr. Alarm ON/OFF screen is displayed, and the current setting (ON) is displayed [Fig. 4].

5. By pressing the up or down key, change the setting to OFF.
   ◆The setting is changed to ON or OFF when the up or down key is pressed.

   Note: When the setting is OFF, freezer alarm buzzer is inactive. The alarm status is indicated by the blinking of red LED lamp only.

6. Press the enter key (ENTER).
   ►The setting is memorized and the screen is changed to the Freezer Setting screen.

7. Press the menu key (MENU/HOME) to display the home screen.
   ►NOFA is displayed on the freezer temperature screen.
   ◆The display returns to the home screen automatically when 90 seconds has passed without any key operation.
Setting the high-temp. alarm of refrigerator

An abnormality (chamber temperature rise) is indicated by the blinking of red LED lamp and the chamber temperature display and the buzzer sounding (15 minutes after blinking) if the chamber temperature exceeds the set value of the high-temperature alarm. Always set the high-temperature alarm to protect stored items from damage resulting from an increase in temperature.

- Setting range for high-temperature alarm:
  between 2 °C and 14 °C higher than the chamber set temperature
- Initial setting (factory setting): 5 °C higher than the chamber set temperature

1. On the home screen, press the menu key (MENU/HOME).
   - The Menu screen is displayed.

2. By pressing the up or down key, move the cursor to the Alarms & Controls [Fig. 1] and then press the enter key (ENTER).
   - The Alarms & Controls screen is displayed.

3. By pressing the up or down key, move the cursor to the Alarm Setting #1 [Fig. 2] and then press the enter key (ENTER).
   - The Alarm Setting #1 screen is displayed.

4. With the cursor on the Ref. High Temp. [Fig. 3], press the enter key (ENTER).
   - The Ref. High Temp. screen is displayed, and the current setting (05) is displayed [Fig. 4].

5. By pressing the right or left key, select the digit to be changed and then change the figure by pressing the up or down key.

6. Press the enter key (ENTER).
   - The setting is memorized and the screen is changed to the Alarm Setting #1 screen.

7. Press the menu key (MENU/HOME) to display the home screen.
   - The display returns to the home screen automatically when 90 seconds has passed without any key operation.
Setting the low-temp. alarm of refrigerator

An abnormality (chamber temperature drop) is indicated by the blinking of red LED lamp and the chamber temperature display and the buzzer sounding (15 minutes after blinking) if the chamber temperature falls below the set value of low-temperature alarm. Always set the low-temperature alarm to protect stored items from damage resulting from a drop in temperature.

- Setting range for low-temperature alarm:
  - between 14 °C and 2 °C lower than the chamber set temperature
- Initial setting (factory setting): 5 °C lower than the chamber set temperature

1. On the home screen, press the menu key (MENU/HOME).
   - The Menu screen is displayed.

2. By pressing the up or down key, move the cursor to the Alarms & Controls [Fig. 1] and then press the enter key (ENTER).
   - The Alarms & Controls screen is displayed.

3. By pressing the up or down key, move the cursor to the Alarm Setting #1 [Fig. 2] and then press the enter key (ENTER).
   - The Alarm Setting #1 screen is displayed.

4. By pressing the up or down key, move the cursor to the Ref. Low Temp. [Fig. 3] and then press the enter key (ENTER).
   - The Ref. Low Temp. screen is displayed, and the current setting (-05) is displayed [Fig. 4].

5. By pressing the right or left key, select the digit to be changed and then change the figure by pressing the up or down key.

6. Press the enter key (ENTER).
   - The setting is memorized and the screen is changed to the Alarm Setting #1 screen.

7. Press the menu key (MENU/HOME) to display the home screen.
   - The display returns to the home screen automatically when 90 seconds has passed without any key operation.
Setting the high-temp. alarm of freezer

An abnormality (chamber temperature rise) is indicated by the blinking of red LED lamp and the chamber temperature display and the buzzer sounding (15 minutes after blinking) if the chamber temperature exceeds the set value of the high-temperature alarm. Always set the high-temperature alarm to protect stored items from damage resulting from an increase in temperature.

- Setting range for high-temperature alarm:
  between 5 °C and 15 °C higher than the chamber set temperature
- Initial setting (factory setting): 10 °C higher than the chamber set temperature

1. On the home screen, press the menu key (MENU/HOME).
  ► The Menu screen is displayed.

2. By pressing the up or down key, move the cursor to the Alarms & Controls [Fig. 1] and then press the enter key (ENTER).
  ► The Alarms & Controls screen is displayed.

3. By pressing the up or down key, move the cursor to the Alarm Setting #1 [Fig. 2] and then press the enter key (ENTER).
  ► The Alarm Setting #1 screen is displayed.

4. By pressing the up or down key, move the cursor to the Fzr. High Temp. [Fig. 3] and then press the enter key (ENTER).
  ► The Fzr. High Temp. screen is displayed, and the current setting (10) is displayed [Fig. 4].

5. By pressing the right or left key, select the digit to be changed and then change the figure by pressing the up or down key.

6. Press the enter key (ENTER).
  ► The setting is memorized and the screen is changed to the Alarm Setting #1 screen.

7. Press the menu key (MENU/HOME) to display the home screen.
  ♦ The display returns to the home screen automatically when 90 seconds has passed without any key operation.
Setting the low-temp. alarm of freezer

An abnormality (chamber temperature drop) is indicated by the blinking of red LED lamp and the chamber temperature display and the buzzer sounding (15 minutes after blinking) if the chamber temperature falls below the set value of low-temperature alarm. Always set the low-temperature alarm to protect stored items from damage resulting from a drop in temperature.

- Setting range for low-temperature alarm:
  between 15 °C and 5 °C lower than the chamber set temperature
- Initial setting (factory setting): 10 °C lower than the chamber set temperature

1. On the home screen, press the menu key (MENU/HOME).
   ►The Menu screen is displayed.

2. By pressing the up or down key, move the cursor to the Alarms & Controls [Fig. 1] and then press the enter key (ENTER).
   ►The Alarms & Controls screen is displayed.

3. By pressing the up or down key, move the cursor to the Alarm Setting #1 [Fig. 2] and then press the enter key (ENTER).
   ►The Alarm Setting #1 screen is displayed.

4. By pressing the up or down key, move the cursor to the Fzr. Low Temp. [Fig. 3] and then press the enter key (ENTER).
   ►The Fzr. Low Temp. screen is displayed, and the current setting (-10) is displayed [Fig. 4].

5. By pressing the right or left key, select the digit to be changed and then change the figure by pressing the up or down key.

6. Press the enter key (ENTER).
   ►The setting is memorized and the screen is changed to the Alarm Setting #1 screen.

7. Press the menu key (MENU/HOME) to display the home screen.
   ◀The display returns to the home screen automatically when 90 seconds has passed without any key operation.
Setting the door buzzer delay

The red LED lamp blinks when the door is opened, and the buzzer sounds (after a delay) to indicate that the door is open.
The delay time (between the blinking of the red LED lamp and the activation of the buzzer) can be changed. Set an appropriate delay time according to the condition of use to prevent the rise of chamber temperature occurring as a result of the door being left open for too long.

- Setting range of delay time: between 0 and 15 minutes (0 means no delay)
- Initial setting (factory setting): 2 minutes

1. On the home screen, press the menu key (MENU/HOME).
   - The Menu screen is displayed.

2. By pressing the up or down key, move the cursor to the Alarms & Controls [Fig. 1] and then press the enter key (ENTER).
   - The Alarms & Controls screen is displayed.

3. By pressing the up or down key, move the cursor to the Alarm Setting #2 [Fig. 2] and then press the enter key (ENTER).
   - The Alarm Setting #2 screen is displayed.

4. With the cursor on the Door Alarm Delay [Fig. 3], press the enter key (ENTER).
   - The Door Alarm Delay screen is displayed, and the current setting (02) is displayed [Fig. 4].

5. By pressing the right or left key, select the digit to be changed and then change the figure by pressing the up or down key.

6. Press the enter key (ENTER).
   - The setting is memorized and the screen is changed to the Alarm Setting #2 screen.

7. Press the menu key (MENU/HOME) to display the home screen.
   - The display returns to the home screen automatically when 90 seconds has passed without any key operation.
Setting the buzzer suspended period

An abnormality is indicated again by the buzzer sounding after a certain period has elapsed (the buzzer recovery time) if the alarm mode continues even after the buzzer has already been silenced by pressing the buzzer stop key (BUZZER STOP). Always set the “buzzer suspended period” to avoid incorrect recognition of alarm mode.

- Setting range of buzzer suspended period: between 0 and 60 minutes in 10-minute intervals
- Initial setting (factory setting): 30 minutes

The buzzer does not sound again when the setting is 0 (but if the other alarm is occurred, the buzzer sounds). The setting should be between 10 and 60 to ensure the safety of stored items.

1. On the home screen, press the menu key (MENU/HOME).
   ►The Menu screen is displayed.

2. By pressing the up or down key, move the cursor to the Alarms & Controls [Fig. 1] and then press the enter key (ENTER).
   ►The Alarms & Controls screen is displayed.

3. By pressing the up or down key, move the cursor to the Alarm Setting #2 [Fig. 2] and then press the enter key (ENTER).
   ►The Alarm Setting #2 screen is displayed.

4. By pressing the up or down key, move the cursor to the Ring Back Delay [Fig. 3] and then press the enter key (ENTER).
   ►The Ring Back Delay screen is displayed, and the current setting (30) is displayed [Fig. 4].

5. By pressing the up or down key, change the figure.

6. Press the enter key (ENTER).
   ►The setting is memorized and the screen is changed to the Alarm Setting #2 screen.

7. Press the menu key (MENU/HOME) to display the home screen.
   ◊The display returns to the home screen automatically when 90 seconds has passed without any key operation.
Setting the buzzer volume

The buzzer volume is selectable. Select the appropriate volume taking into consideration of the environment of installation site.

- Setting range of buzzer volume: Low (small = standard), High (loud)
- Initial setting (factory setting): Low (small = standard)

1. On the home screen, press the menu key (MENU/HOME).
   ►The Menu screen is displayed.

2. By pressing the up or down key, move the cursor to the Alarms & Controls [Fig. 1] and then press the enter key (ENTER).
   ►The Alarms & Controls screen is displayed.

3. By pressing the up or down key, move the cursor to the Alarm Setting #2 [Fig. 2] and then press the enter key (ENTER).
   ►The Alarm Setting #2 screen is displayed.

4. By pressing the up or down key, move the cursor to the Alarm Volume [Fig. 3] and then press the enter key (ENTER).
   ►The Alarm Volume screen is displayed, and the current setting (LOW) is displayed [Fig. 4].

5. By pressing the up or down key, change the setting to HIGH.
   ◦The setting is changed to LOW or HIGH when the up or down key is pressed.

6. Press the enter key (ENTER).
   ►The setting is memorized and the screen is changed to the Alarm Setting #2 screen.

7. Press the menu key (MENU/HOME) to display the home screen.
   ◦The display returns to the home screen automatically when 90 seconds has passed without any key operation.
Setting the remote alarm

The alarm of this unit can be informed at a remote location from this unit by connecting the external alarm device (commercial goods) to the remote alarm terminals. It is selectable that the operation of the external alarm device is linked with the buzzer or not.

In the case of link: The alarm of the external device is cancelled when by buzzer stop key (BUZZER STOP) is pressed during buzzer operation. But the alarm is not cancelled in the case of power failure alarm.

In the case of no-link: The alarm of the external device is not cancelled when by buzzer stop key (BUZZER STOP) is pressed during buzzer operation.

- Setting range of remote alarm: OFF (no-link), ON (link)
- Initial setting (factory setting): OFF (no-link)

1. On the home screen, press the menu key (MENU/HOME).
   ►The Menu screen is displayed.

2. By pressing the up or down key, move the cursor to the Alarms & Controls [Fig. 1] and then press the enter key (ENTER).
   ►The Alarms & Controls screen is displayed.

3. By pressing the up or down key, move the cursor to the Alarm Setting #2 [Fig. 2] and then press the enter key (ENTER).
   ►The Alarm Setting #2 screen is displayed.

4. By pressing the up or down key, move the cursor to the Remote ON/OFF [Fig. 3] and then press the enter key (ENTER).
   ►The Remote ON/OFF screen is displayed, and the current setting (OFF) is displayed [Fig. 4].

5. By pressing the up or down key, change the setting to ON.
   ◊The setting is changed to ON or OFF when the up or down key is pressed.

6. Press the enter key (ENTER).
   ►The setting is memorized and the screen is changed to the Alarm Setting #2 screen.

7. Press the menu key (MENU/HOME) to display the home screen.
   ◊The display returns to the home screen automatically when 90 seconds has passed without any key operation.
SETTING THE SELECTABLE PARAMETERS

Setting the interior light

The lighting condition of the interior light can be selectable among three; link with door operation, always ON, always OFF.

- Setting range of interior light: link with door operation (AUTO), always ON (ON), always OFF (OFF)
- Initial setting (factory setting): link with door operation (AUTO)

1. On the home screen, press the menu key (MENU/HOME).
   ► The Menu screen is displayed.

2. By pressing the up or down key, move the cursor to the Alarms & Controls [Fig. 1] and then press the enter key (ENTER).
   ► The Alarms & Controls screen is displayed.

3. By pressing the up or down key, move the cursor to the Interior Light [Fig. 2] and then press the enter key (ENTER).
   ► The Interior Light screen is displayed, and the current setting (AUTO) is displayed [Fig. 3].

4. By pressing the up or down key, change the setting.
   ◊ The setting is changed to OFF, ON or AUTO when the up or down key is pressed.

5. Press the enter key (ENTER).
   ► The setting is memorized and the screen is changed to the Alarms & Controls screen.

6. Press the menu key (MENU/HOME) to display the home screen.
   ◊ The display returns to the home screen automatically when 90 seconds has passed without any key operation.
SETTING THE SELECTABLE PARAMETERS

Setting the compressor delay

The delay time before the compressor starts can be changed to reduce the load on the power line and to facilitate the start-up (reset) of the refrigerator during recovery after power failure.

<Important>
Change the delay time only when the multiple devices are connected to one power source.

- Setting range of delay time: between 3 minutes and 15 minutes
- Initial setting (factory setting): 3 minutes

1. On the home screen, press the menu key (MENU/HOME).
   ► The Menu screen is displayed.

2. By pressing the up or down key, move the cursor to the Alarms & Controls [Fig. 1] and then press the enter key (ENTER).
   ► The Alarms & Controls screen is displayed.

3. By pressing the up or down key, move the cursor to the Comp. Delay [Fig. 2] and then press the enter key (ENTER).
   ► The Comp. Delay screen is displayed, and the current setting (03) is displayed [Fig. 3].

4. By pressing the right or left key, select the digit to be changed and then change the figure by pressing the up or down key.

5. Press the enter key (ENTER).
   ► The setting is memorized and the screen is changed to the Alarms & Controls screen.

6. Press the menu key (MENU/HOME) to display the home screen.
   ♦ The display returns to the home screen automatically when 90 seconds has passed without any key operation.
Setting the device ID for data acquisition

Set a device ID for data acquisition when using the optional data acquisition system (MTR-5000).

- Setting range of device ID: between 0 and 255
- Initial setting (factory setting): 000

1. On the home screen, press the menu key (MENU/HOME).
   ▶ The Menu screen is displayed.

2. By pressing the up or down key, move the cursor to the Alarms & Controls [Fig. 1] and then press the enter key (ENTER).
   ▶ The Alarms & Controls screen is displayed.

3. By pressing the up or down key, move the cursor to the DAQ Setting [Fig. 2] and then press the enter key (ENTER).
   ▶ The DAQ Setting screen is displayed.

4. With the cursor on the DAQ ID [Fig. 3], press the enter key (ENTER).
   ▶ The DAQ ID screen is displayed, and the current setting (000) is displayed [Fig. 4].

5. By pressing the right or left key, select the digit to be changed and then change the figure by pressing the up or down key.

6. Press the enter key (ENTER).
   ▶ The setting is memorized and the screen is changed to the DAQ Setting screen.

7. Press the menu key (MENU/HOME) to display the home screen.
   ▶ The display returns to the home screen automatically when 90 seconds has passed without any key operation.
Setting the speed for data acquisition

Set a communicating speed for data acquisition when using the optional data acquisition system (MTR-5000).

- Setting range of communicating speed: 2400 bps, 4800 bps, 9600 bps
- Initial setting (factory setting): 2400 bps

1. On the home screen, press the menu key (MENU/HOME).
   ►The Menu screen is displayed.

2. By pressing the up or down key, move the cursor to the Alarms & Controls [Fig. 1] and then press the enter key (ENTER).
   ►The Alarms & Controls screen is displayed.

3. By pressing the up or down key, move the cursor to the DAQ Setting [Fig. 2] and then press the enter key (ENTER).
   ►The DAQ Setting screen is displayed.

4. By pressing the up or down key, move the cursor to the DAQ Speed [Fig. 3] and then press the enter key (ENTER).
   ►The DAQ Speed screen is displayed, and the current setting (2400) is displayed [Fig. 4].

5. By pressing the up or down key, change the setting.
   ◦The setting is changed to 2400, 4800 or 9600 when the up or down key is pressed.

6. Press the enter key (ENTER).
   ►The setting is memorized and the screen is changed to the DAQ Setting screen.

7. Press the menu key (MENU/HOME) to display the home screen.
   ◦The display returns to the home screen automatically when 90 seconds has passed without any key operation.
By the remote control, the setting of chamber temperature can be changed through the software of the optional data acquisition system (MTR-5000).

- Setting range of remote control:
  - LOCAL (change of the chamber set temperature remotely is unable) or,
  - REMOTE (change of the chamber set temperature remotely is enable)

- Initial setting (factory setting): LOCAL (change of the chamber set temperature remotely is unable)

1. On the home screen, press the menu key (MENU/HOME).
   ►The Menu screen is displayed.

2. By pressing the up or down key, move the cursor to the Alarms & Controls [Fig. 1] and then press the enter key (ENTER).
   ►The Alarms & Controls screen is displayed.

3. By pressing the up or down key, move the cursor to the DAQ Setting [Fig. 2] and then press the enter key (ENTER).
   ►The DAQ Setting screen is displayed.

4. By pressing the up or down key, move the cursor to the Local / Remote [Fig. 3] and then press the enter key (ENTER).
   ►The Local / Remote screen is displayed, and the current setting (LOCAL) is displayed [Fig. 4].

5. By pressing the up or down key, change the setting to REMOTE.
   ◆The setting is changed to LOCAL or LEMOTE when the up or down key is pressed.

6. Press the enter key (ENTER).
   ►The setting is memorized and the screen is changed to the DAQ Setting screen.

7. Press the menu key (MENU/HOME) to display the home screen.
   ◆The display returns to the home screen automatically when 90 seconds has passed without any key operation.

Note: In the case of REMOTE setting, R is displayed upper right on the Ref. Set Temp. screen and Fzr. Set Temp. screen. This means the change of the chamber (refrigerator and freezer) set temperature is unable.
Setting the date display (format)

The format of date display is selectable between two types.

- Setting range: year / month / day (YY/MM/DD), or day / month / year (DD/MM/YY)
- Initial setting (factory setting): year / month / day (YY/MM/DD)

1. On the home screen, press the menu key (MENU/HOME).
   ► The Menu screen is displayed.

2. By pressing the up or down key, move the cursor to the Alarms & Controls [Fig. 1] and then press the enter key (ENTER).
   ► The Alarms & Controls screen is displayed.

3. By pressing the up or down key, move the cursor to the Date & Time [Fig. 2] and then press the enter key (ENTER).
   ► The Date & Time screen is displayed [Fig. 3].

4. With the cursor on the Date Format [Fig. 3], press the enter key (ENTER).
   ► The Date Format screen is displayed, and the current setting (YY/MM/DD) is displayed [Fig. 4].

5. By pressing the up or down key, change the setting to DD/MM/YY.
   ► The setting is changed to YY/MM/DD, DD/MM/YY when the up or down key is pressed.

6. Press the enter key (ENTER).
   ► The setting is memorized and the screen is changed to the Date & Time screen.

7. Press the menu key (MENU/HOME) to display the home screen.
   ► The display returns to the home screen automatically when 90 seconds has passed without any key operation.

Setting the date

1. On the home screen, press the menu key (MENU/HOME).
   ►The Menu screen is displayed.

2. By pressing the up or down key, move the cursor to the Alarms & Controls [Fig. 1] and then press the enter key (ENTER).
   ►The Alarms & Controls screen is displayed.

3. By pressing the up or down key, move the cursor to the Date & Time [Fig. 2] and then press the enter key (ENTER).
   ►The Date & Time screen is displayed.

4. By pressing the up or down key, move the cursor to the Date [Fig. 3] and then press the enter key (ENTER).
   ►The Date screen is displayed, and the current date (YY/MM/DD) is displayed [Fig. 4].

5. By pressing the right or left key, select the digit to be changed and then change the figure by pressing the up or down key.
   The figure can be changed same as above when the date format is DD/MM/YY.

6. Press the enter key (ENTER).
   ►The setting is memorized and the screen is changed to the Date & Time screen.

7. Press the menu key (MENU/HOME) to display the home screen.
   ◊The display returns to the home screen automatically when 90 seconds has passed without any key operation.
Setting the time

It is recommended to adjust the time periodically since the deviation of about one minutes per a month may be occurred.

1. On the home screen, press the menu key (MENU/HOME).
   ►The Menu screen is displayed.

2. By pressing the up or down key, move the cursor to the Alarms & Controls [Fig. 1] and then press the enter key (ENTER).
   ►The Alarms & Controls screen is displayed.

3. By pressing the up or down key, move the cursor to the Date & Time [Fig. 2] and then press the enter key (ENTER).
   ►The Date & Time screen is displayed.

4. By pressing the up or down key, move the cursor to the Time [Fig. 3] and then press the enter key (ENTER).
   ►The Time screen is displayed, and the current time is displayed [Fig. 4].

5. By pressing the right or left key, select the digit to be changed and then change the figure by pressing the up or down key.
   ◇hh:mm:ss means the hour, minute and second can be set in 2-digit.
   hh = hour (between 00 and 23), mm = minute (between 00 and 59), ss = second (between 00 and 59)

6. Press the enter key (ENTER).
   ►The setting is memorized and the screen is changed to the Date & Time screen.

7. Press the menu key (MENU/HOME) to display the home screen.
   ◇The display returns to the home screen automatically when 90 seconds has passed without any key operation.
REMOTE ALARM TERMINAL

The alarm is relayed to a remote location when a remote alarm device (commercially available) is connected to the remote alarm terminal. Installation of a remote alarm device is recommended when the unit is installed in an unattended location so that the operator of the unit is notified of the alarm.

- Contact our representative or agent to arrange the installation of a remote alarm device.

- Location of remote alarm terminal: right bottom (inside)
- Allowable contact capacity: DC 30 V, 2 A
- It is recommended to use standard signal and interface cables with a maximum length of 30 meters.

<Important>
The remote alarm terminal will be in alarm mode when the power supply cord is unplugged or the power switch is turned off because this will be interpreted as a power failure.
This unit has the alarm functions and self-diagnosis functions listed below. An error code and error message are displayed on the temperature display when an alarm or self-diagnosis goes off. Contact our sales representative or agent if the alarm mode continues, since the failure of the unit is supposed.

Before calling for service, take some precautions to prevent the stored items (for example by transferring the items to another freezer).

The first letter of the error code means:
W: Warning - The cooling performance is significantly reduced.
A: Alarm - The cooling performance may decline and the temperature of the chamber may rise.
S: Status - There is a possibility of failure other than the cooling performance. Or the status of the unit is notified.

ROUTINE MAINTENANCE

Cleaning of exterior, interior, and accessories

Use a dry cloth to wipe off small amounts of dirt on the outside and inside of the unit and all accessories. If the outside panels are dirty, clean them with a diluted neutral dishwashing detergent. Wipe off the condensation on the glass (MPR-N45FH) or exterior of the cabinet with a dry soft cloth.

❖ Undiluted detergent can damage the plastic components. For the dilution, refer to the instruction of the detergent.
❖ After the cleaning with the diluted detergent, always wipe it off with a wet cloth. Then wipe off the cabinet or accessories with a dry cloth.

<Important>
Never pour water onto or into the unit. This may cause electric shock or failure.

Do not use a brush, an acid, a thinner, laundry soap, a powder detergent, or boiling water for cleaning. These may cause damage to painted surfaces or cause perishing of plastic and rubber components. Moreover, do not wipe plastic and rubber components with a volatile material.
Defrosting the refrigerator

The following 2 types of defrosting methods is provided for the refrigerator. Both of them are controlled automatically.

■ Cycle defrosting
The refrigerator temperature is kept stable by ON/OFF operation of the compressor. When the compressor is OFF (stopped), the frost on the evaporator is melted by the heater. This defrosting never influences to the refrigerator temperature.

■ Defrosting by defrost sensor
The cycle defrosting may not be sufficient to remove the frost on the evaporator when the ambient temperature is high, the door is opened frequently, or heavy moist items are stored in the refrigerator. In this case, the defrosting operation is started automatically when the defrost sensor detects the frost. During the defrosting, DEF is displayed on the temperature display of home screen. After completion of defrosting, DEF display is disappeared and the refrigerator returns to the normal operation.

<Important>
During the defrosting, the refrigerator temperature reaches around 10 °C temporary.

<Reference>
Too much frost is accumulated on the evaporator when the refrigerator is running under high temperature and humidity condition. For example, the defrosting operation is started once a week when the refrigerator is running with 2 °C setting at 30 °C, 80 % R.H.

Defrosting the freezer

The freezer has no automatic defrosting system. Stop the freezer operation and remove the frost when the frost is accumulated in the freezer (when the defrost indicator is covered with frost).

Following shows the procedure for defrosting.
1. Move all storage items in the freezer to other freezer.
2. Stop the freezer operation according to the procedure on page 36.
3. After the frost in the freezer is melted, take out the drain hose (see the figure). Set a pan under the drain hose. Remove the drain hose cap and drain port cap in the freezer to drain the water.
4. Wipe off the freezer with a dry cloth. Replace the caps to the drain hose and store the drain hose. Then replace the cap to the drain port in the freezer.
5. Start the freezer operation according to the procedure on page 36.
6. Check that the freezer temperature reaches the set temperature and replace the storage items.
# TROUBLESHOOTING

If the unit malfunctions, check out the following before calling for service.

**<Attention>**
If the malfunction is not resolved after checking the following items or if the malfunction is not shown in the table below, contact our sales representative or agent.

*Label indication is obliged to comply with Taiwanese battery regulation.*

### Decontamination of unit

Before disposal of unit with biohazardous danger, decontaminate the unit to the extent possible by the user.
**Disposal of Old Equipment and Batteries**

Only for European Union and countries with recycling systems

These symbols on the products, packaging, and/or accompanying documents mean that used electrical and electronic products and batteries must not be mixed with general household waste.

For proper treatment, recovery and recycling of old products and used batteries, please take them to applicable collection points in accordance with your national legislation.

By disposing of them correctly, you will help to save valuable resources and prevent any potential negative effects on human health and the environment.

For more information about collection and recycling, please contact your local municipality.

**Penalties may be imposed for incorrect disposal of this waste, in accordance with national legislation.**

**Note for the battery symbol (bottom symbol):**

This symbol might be used in combination with a chemical symbol. In this case it complies with the requirement set by the Directive for the chemical involved.

---

**Likwidacja opotrebowanych zariaden a baterii**

Len pre Európsku úniu a krajiny so systémom recyklačie

Tieto symboly uvádzané na výrobokoch, balení a/alebo v sprievodných dokumentoch označujú, že pomerne elektrické a elektronické výrobky a baterie sa nesmú likvidovať ako bežný domový odpad.

V zákume zabezpečenia správneho spôsobu likvidácie, sprácovania a recyklačie odôvodňujú opotrebované výrobky a baterie na špecializovanom zbiernom mieste v súlade s platnou legislatívou.

Správnym spôsobom likvidácie týchto výrobkov a baterií príspevok k zachovaniu cenných zdrojov a predišet vždy negatívnym dopadom na lidské zdravie a životné prostredie.

Podrobnejšie informácie o zbore a recyklačii vám poskytnú miestne úrady. Prie nesprávnej likvidácii tohto druhu odpadu môžu byť v súlade s platnou legislatívou udelené pokuty.

**Poznámka týkajúca sa symbolu baterie (spodný symbol):**

Tento symbol môže byť použitý spolu so symbolom chemické značky. V takom pripade vytvára pozadia stanovené Smernicu týkajúcou sa príslušnej chemikálie.

---

**Izjava o izkoljulementu odločitev o izpeljanje in baterijah**

Samo za Evropskega sôob in stran osebi in sistemi za recikliranje

Ta znamki se uporabljajo na proizvodi, embalaži in priložnih dokumentih, ki jih uporabljajo proizvajalci, ki izdelujejo in reciklirajo električne in elektronske izdelke, kot tudi baterije.

Za preprosto odločitev o izpeljanje in baterijah, mora biti izdelki in baterije za odločitev o izpeljanih izdelkih in baterijah popolnoma ustreznih za priključitev v pravilno delujoči in v načinu, ki izpeljači, ki pri ustreznih baterijah. Vendar pa tudi pravilno delujoči in v načinu, ki izpeljači, ki pri ustreznih baterijah.

Ustrezno izpeljanje izdelkov znači, da so izpeljani izdelki in baterije izpeljeni v skladu z ustrezno odločbo.

**Ukaz za simbol baterije (simbol dolž):**

Taki symbol może występować wraz z symbolem chimikalię. W takim przypadku wymagania Dyrektywy świetnie określonego środka chemicznego są spełnione.

---

**Tájékoztatás felhasználók számára az elhasználódt készletek, szárazelemek és akkumulátorokkel és ártalmatlanításáról**

Csak az Európai Unió és olyan országok részére, amelyek begyűjtő és ártalmatlanító rendszerrel rendelkeznek

A terméken, a csomagoláson és/vagy a kísérő dokumentumokon szereplő szimbólumok azt jelentik, hogy az elhasználódt elektromos és elektronikus termékeket, szárazelemeket és akkumulátorokat tölos az általános háztársági hulladékkal kevereni.

Az elhasználódt készletek, szárazelemek és akkumulátorok kifogásánál vagy a kifejezések között, hogy a helyi törvényeknek megfelelően jutatja azokat a kijelölt gyűjtőhelyeken.

**Poznámka týkajúca sa symbolu baterie (spodný symbol):**

Tento symbol môže byť použitý spolu so symbolom chemické značky. V takom pripade vytvára pozadia stanovené Smernicu týkajúcou sa príslušnej chemikálie.

---

**Posobywaję się zużytych urządzeniach elektrycznych i elektronicznych oraz baterii.**

Dotyczy wyłącznie obszaru Unii Europejskiej oraz krajów posiadających systemy zbiorki i recyklingu

Niniejsze symbole umieszczane na produktach, opakowaniach i/lub w dokumentacji towarzyszącej označają, że zużyte urządzenia elektryczne i elektroniczne oraz zużyte baterie nie mogą być mieszane z innymi odpadami domowymi/komunalnymi.

W celu zapewnienia właściwego przetwarzania, utylizacji oraz recyklingu zużytych urządzeń elektrycznych i elektronicznych oraz zużytych baterii, należy oddawać je do wyznaczonych punktów gromadzenia odpadów zgodnie z przepisami prawa krajowego.

Podczas prawidłowe posyłanie się zużytych urządzeń elektrycznych i elektronicznych oraz zużytych baterii, należy oddawać je do wyznaczonych punktów gromadzenia odpadów zgodnie z przepisami prawa krajowego.

**Pomembna informacija za pravilno odstranjevanje izbranjene opreme in baterij**

Samo za države EU in države, kjer imajo vzpostavljen sistem recikliranja odpadnjih snovi

Ta simbol na samem izdelku, embalaži ali sprememljivih dokumentih pomeni, da po koncu življenške dobe aparata, z njim ni dovoljeno ravnati kot z drugimi gospodinjskimi odpadki.

Vaša dolžnost je, da izrabljeno opremo ali napravo ter baterije vložite v odstranjevanje na posebna kapaciteta za baterije vložek predate v odstranjevanje na posebna kapaciteta za baterije vložek.

E hulladékok szállítalni elhelyezését a nemzeti jogszabályok büntétheti.

**Megjegyzés a szárazelem- és akkumulátor-szimbólummal kapcsolatban (alsó szimbólumpélda):**

Ezek a szimbólumok kémiai szimbólummal együtt alkalmazhatók. Ezen az esetben teljesíti az EU irányelvek vegyí angya koratkozó következményét.

---

**Pomembna informacija za pravilno odstranjevanje izbranjene opreme in baterij**

Samo za države EU in države, kjer imajo vzpostavljen sistem recikliranja odpadnjih snovi

Ta simbol se uporablja v kombinaciji s kemičnim simbolom. V takšnem primeru odgovarja zahtevi, ki jo določa direktiva za dotično kemičko.
DISPOSAL OF UNIT

L’élimination des équipements et des batteries usagés
Solamente para la Unión Europea y países con sistemas de reciclaje.

Applicable dans les pays membres de l’Union européenne et les pays disposant de systèmes de recyclage. 

En les eliminant conformément à la réglementation en vigueur, vous contribuez à éviter le gaspillage de ressources précieuses ainsi qu’à protéger la santé humaine et l’environnement.

Note relative au pictogramme à apposer sur les piles (pictogramme du bas)
Si ce pictogramme est combiné avec un symbole chimique, il répond également aux exigences posées par la Directive relative au produit chimique concerné.

Eski Ekipman ve Bataryaların Türşüsü
Sadece Avrupa Birliği ve geri dönüştüm sistemleri olan ülkeler için

Grazie alla raccolta, il riciclo e la valorizzazione dei prodotti elettrici ed elettronici, vi state contribuendo alla conservazione dei preziosi risorse naturali e alla protezione della salute umana e dell’ambiente.

Nota sulla convenzione sulla riciclaggio dei materiali elettronici (simbolo tavola):
Questo simbolo viene usato in combinazione con il simbolo chimico. In questo caso, si applicano i requisiti della Direttiva sul prodotto chimico concernente.

Disposal of Unit

Applicable only in the countries of the European Union and countries with recycling systems.

L’eliminación de los equipos y baterías usados
Solamente para la Unión Europea y países con sistemas de reciclaje.

Apposé sur le produit lui-même, sur son emballage, ou figurant dans la documentation qui l’accompagne, ce pictogramme indique que les piles, appareils électriques et électroniques usagés, doivent être séparées des ordures ménagères.

Non-responsive discharge of identical materials in the country of the importer.

Pour les plus amples renseignements sur la collecte et le recyclage, veuillez vous renseigner auprès des collectivités locales.

Note relative au pictogramme à apposer sur les piles (pictogramme du bas)
Si ce pictogramme est combiné avec un symbole chimique, il répond également aux exigences posées par la Directive relative au produit chimique concerné.

Vain EU-jäsenemäille ja kierrätysjärjestelmää käyttäville maille
Tämä symboli tuotteissa, pakkausaukossa ja tässä asiakirjoissa tarkoittaa, että käytettyä sähköllä toimivia ja elektronisia tuotteita ei saa laittaa yleisiin talousjätteisiin.

Hävittämällä tuotteet asianmukavasti, autat samalla suojamaan arvokkaita luonnonvaroja ja estämään mahdollisia negatiivisia vaikutuksia ihmiseen ja luontoon. 

Maiden labsaita annetulla määräysten vastaanestavaisesta hävittämisestä voidaan antaa sakkorangaistusta.

Huomautus paristosymbolista (symboli alhaalla):
Tämä symboli voidaan näyttää jonkin kemiallisen symbolin yhteydessä. Silloin se perustuu tavastavoinnille, jotka on annettu kyseessä olevalle kemikaalille.

Entsorgung von Altgeräten und Batterien
Nur für die Europäische Union und Länder mit Recycling-Systemen

Dieses Symbol, auf den Produkten, der Verpackung und/oder den Begleitdokumenten, bedeutet, dass gebrauchte elektrische und elektronische Produkte sowie Batterien nicht in den allgemeinen Hausmüll geben werden dürfen.

Hinweis für das Batteriesymbol (Symbol unten):
Diese Symbole kann in Kombination mit einem chemischen Symbol abgebildet sein. In diesem Fall erfolgt dieses auf Grund der Anforderungen derjenigen Richtlinien, die für die betreffende Chemikalie erlassen wurden.

Eliminación de Aparatos Viejos y de Pilas y Baterías
Solamente para la Unión Europea y países con sistemas de reciclado.

Estos símbolos en los productos, su embalaje o en los documentos que los acompañan significan que los productos eléctricos y/o pilas y baterías usadas no deben mezclarse con los residuos domésticos.

Para el adecuado tratamiento, recuperación y reciclaje de los productos viejos y pilas y baterías usadas llevadas a los puntos de recogida de acuerdo con su legislación nacional. 

En España, los usuarios están obligados a entregar las pilas en los correspondientes puntos de recogida. En cualquier caso, la entrega por los usuarios será sin coste alguno para estos. El coste de la gestión medioambiental de los residuos de pilas, acumuladores y baterías está incluido en el precio de venta.

Si los elimina correctamente ayudará a preservar valiosos recursos y evitará potenciales efectos negativos sobre la salud de las personas y sobre el medio ambiente.

Para más información sobre la recogida u reciclaje, por favor contacte con su ayuntamiento.

Puede haber sanciones por una incorrecta eliminación de este residuo, de acuerdo con la legislación nacional.

Nota para el símbolo de pilas y baterías (simbolo debajo):
Este símbolo puede usarse en combinación con el símbolo químico. En este caso, cumple con los requisitos de la Directiva del producto químico indicado.
SmalTIMENTO di vecchie apparecchiature e batterie usate
Solo per Unione Europea e Nazioni con sistemi di raccolta e smaltimento

Questi simboli sui prodotti, sull’imballaggio e/o sulle documentazioni o manuali accompagnanti i prodotti indicano che i prodotti elettrici, elettronici e le batterie usate non devono essere buttati nei rifiuti domestici generici. Per un trattamento adeguato, recupero e riciclaggio di vecchi prodotti elettrici, elettronici e batterie, vi invitiamo a portarli negli appositi punti di raccolta secondo la legislazione vigente nel vostro paese.

Con un smaltimento corretto contribuirete a salvare importanti risorse e ad evitare i potenziali effetti negativi sulla salute umana e sull’ambiente.

Per ulteriori informazioni su raccolta e riciclaggio, vi invitiamo a contattare il comune locale.

Lo smaltimento non corretto di questi rifiuti potrebbe comportare sanzioni in accordo con la legislazione nazionale.

Nota per il simbolo batterie (simbolo sotto):
Questo simbolo può essere usato in combinazione con un simbolo chimico. In questo caso è conforme ai requisiti indicati dalla Direttiva per il prodotto chimico in questione.

Depunerea la deşeuri a echipamentelor gi şi a bateriilor vechi
Doar pentru Uniunea Europeană şi pentru ţările cu sistem de reciclare

Aceste simboluri de pe produse, ambalaje şi/sau documente însoţitoare indică faptul că produsele electrice şi electronice, precum şi bateriile uzate nu trebuie să fie amestecate cu deşeuri menajere obișnuite.

Pentru un tratament corespunzător pentru recuperarea şi reciclarea produselor electrice şi electronice, precum şi a bateriilor uzate, vă rugăm să le depuneţi la punctele de colectare special aménagées, în conformitate cu legislaţia naţională.

Prin depunerea corespunzătoare a acestora la deşeuri, veți ajuta la economisirea unor resurse valoroase şi veți preveni posibilele efecte negative asupra sănătății umane şi asupra mediului înconjurător.

Pentru mai multe informaţii despre colectare şi reciclare, vă rugăm să contactaţi autorităţile locale.

Este posibil ca depunerea incorectă la deşeuri să fie pedepsită în conformitate cu legislaţia naţională.

Notă pentru simbolumul de baterie (ultimele două exemple de simboluri):
Acest simbol poate fi utilizat în combinaţie cu un simbol chimic. În acest caz, acesta este conform cu cerinţele stabilite de Direcţivă pentru elementul chimic în cauză.

Senju prietaisu ir akumuliatoriaus utilizavimas
Taikoma tik Europos Sąjungai ir šalims, kuriose naudojamas
perdirbimo sistemos
Solo per Unione Europea e Nazioni con sistemi di reciclaggio

Questi simboli sui prodotti, sull’imballaggio e/o sulle documentazioni o manuali accompagnanti i prodotti indicano che i prodotti elettrici, elettronici e le batterie usate non devono essere buttati nei rifiuti domestici generici. Indsamling av elektronikskrot och brugte batterier
Kun for Den Europæiske Union og lande med retssystemer

Dette symbol kan anvendes sammen med et kemisk symbol, hvis det er relevant. I så fald er dette symbol i overensstemmelse med det relevante kemiske symbol. I andre tilfælde er dette symbol i overensstemmelse med den nationale lovgivning.

For korrekt behandling, indsamling og genbrug af gamle elektriske og elektroniske produkter og batterier skal de tages til den retssystem, der er fastsat i indsamplingssteder i overensstemmelse med den nationale lovgivning.

Ved at skaffe sig af med dem på korrekt vis hjælper du med til at spare værdifulde ressourcer og forhindre eventuelle negative påvirkninger af menneskers sundhed og miljø.

Usakgodig bortskaffelse af elektronikskrot og batterier kan eventuelt udgøre bødeforlæggelse.

Information om batterisymbol (eksempler nedenfor):
Dette symbol kan anvendes sammen med et kemisk symbol. I så fald opfylder det kravene for det direktiv, som er blevet fastlagt for det pågældende kemikalie.

Rimi ta’ Tagħmir Antik u Batterji
Għall-Unjoni Ewropea u għall-pajjiż b’sistemi ta’ rิčlāgg biss

Dan is-simboli fuq il-prodotti, l-imballaġġ u/jew ledssagedokumenti betyder, at brugte elektriske og elektroniske produkter og batterier ikke må blandes med almindeligt husholdningsaffald.

For korrekt behandling, indsamling og genbrug af gamle elektriske og elektroniske produkter og batterier skal de tages til den retssystem, der er fastsat i indsamplingssteder i overensstemmelse med det relevante kemiske symbol.

Molimo vas da prema zakonskim odredbama baviti se ovlaštenim odbornikom ili prodavcom i istrošene baterije predate na odvratom sabiralištima na daljinu obradu, pripremnom odn. recikliranje. Ako te proizvode i baterije propisno zbrinete, pomažete u zaštitu dragocjenih resursa, a istovremeno i svrhu da se izbjegave eventualne negativne utjecaje na ljudsko zdravlje i okoliš.

Zbog nepropisnog zbrinjavanja ovog otpada mogu se, ovisno o lokalnim propisima zemlje, izrči i novčane kazne.

Il simbolo per smaltimento batterie (simbolo di degrado):
Ovaj simbol može biti prikazan samo u kombinaciji s kemskim simbolom. U to se slučaj u potrebi napomena za baterije smatraju se degradiranim.

Zbrinjavanje starih uređaja u baterije
Samo za Europsku uniju i zemlje koje posjeduju sustav smještavanja starih električnih i elektronskih proizvoda te baterije ne smiju bacati u kucanski otpad.

Ovaj simbol na proizvodima, pakiranja ili popravnim dokumentima znači da se iskorišteni električni i elektronski proizvodi te baterije ne smiju bacati u kucanski otpad.

Zbog nepropisnog zbrinjavanja ovog otpada mogu se, ovisno o lokalnim propisima zemlje, izrči i novčane kazne.
Avfallshantering av produkter och batterier
Endast för Europeiska Unionen och länder med återvinningsystem
Dessa symboler på produkter, förpackningar och/eller medföljande dokument betyder att förbrukade elektriska och elektroniska produkter och batterier inte får blandas med vanliga hushållsavfall.

För att ge produkter och använda batterier ska hanteras och återvinnas på rätt sätt så att dom lämnas till passande uppsamlingsställe i enlighet med nationella bestämmelser.

Genom att ta hänsyn till detta kan du hjälpa till att spara värdefulla resurser och förhindra eventuella negativa effekter på människors hälsa och på miljön.

For mer information om insamling och återvinning kontaktad din kommun.

Olämplig avfallshantering kan bestraffas med böter.

Notering till batterisymbolen (nedanför):
Denna symbol kan användas i kombination med en kemisk symbol. I detta fall utfyller den de krav som ställs i direktivet för den aktuella kemikalen.

Het ontdoen van oude apparatuur en batterijen.
Enkel voor de Europese Unie en landen met recycle systemen.

Deze symbolen op de producten, verpakkingen en/of begeleidende documenten betekenen dat gebruikte elektrische en elektronische producten en batterijen niet samen mogen worden weggegooid met de rest van het hushoudelijk afval.

Voor een juiste verwerking, hergebruik en recycling van oude producten en batterijen, gelieve deze in te leveren bij de desbetreffende inleverpunten in overeenstemming met uw nationale wetgeving.

Door ze op de juiste wijze weg te gooien, helpt u mee met het besparen van kostbare hulpbronnen en voorkomt u potentiële negative effecten op de volksgezondheid en het milieu.

Voor meer informatie over inzameling en recycling kunt u contact opnemen met uw plaatselijke gemeente.

Afhankelijk van uw nationale wetgeving kunnen er boetes worden opgelegd bij het onjuist weggooi van dit soort afval.

Let op: het batterij symbool (Onderstaand symbool).
Dit symbool kan in combinatie met een chemisch symbool gebruikt worden. In dit geval volstaan de eisen, die zijn vastgesteld in de richtlijnen van de desbetreffende chemische stof.

Brukerinformasjon om innsamling av gammelt utstyr og brukte batterier
Bare for EU og land med retur systemer
Slike symboler på produkter, emballasjes, og/eller på medfølgende dokumenter betyr at brukte elektriske/elektroniske produkter og batterier ikke må blande med vanlig husholdningsavfall.

For riktig håndtering og gjenvinning av gamle produkter og brukte batterier, venligst deres til innsamlingssteder i overensstemmelse med nasjonalt lovgivning.

Ved riktig håndtering av disse produktene og batteriene, hjelper du til med å spare verdifulle ressurser og forhindre potensielle negative effekter på menneskers helse og miljø.

For mer informasjon om innsamling og gjenvinning venligst tak kontakt med din kommune.

Ukorrekt håndtering av dette avfallet kan medføre straffansvars, i overensstemmelse med nasjonals lovgivning.

Merknader for batterisymbolet (nederste symbol):
Dette symbol kan bli brukt i kombinasjon med et kemisk symbol. I dette tilfellet etterkommer det kravet satt av den relevante bestemmelsen.

Het ontstonden van oude apparatuur en batterijen.
Enkel voor de Europese Unie en landen met recycle systemen.

Nolieto elektronisko ierīcu un elektroprecu un bateriju utilizācijas
Tikai Eiropas valstis ar utilizācijas sistēmu
Šis simbs, kas izvietots uz rāzieniem, irzīnojuma un/vai pavadodokumentiem nozīmē, ka nolieztos elektrisko ierīcēm un elektriskajām produkta un baterijām nedrīkst izmest kopā ar parastiem mājsaimniecības avāriem.

Nogādājiet nolieoto ražojumu un nokāpjojās baterijas tālākā apstrādes, pārstrādes, resp., materiālu ieroču atiteklajās un atkritumu savākšanās vietās, vietas saskaņā spēkā esošajām likumdošanas prasībām.

Nododot šos ražojumus un baterijas profesionālai utilizācijai, jūs palīdzēsiet savākt savus resursus un novērst jūsu iespējamo kaitējumu sabiedricē.

Saskaņā ar nacionālu likumdošanu par nepareizu šāda veida atkritumu utilizāciju var uzlikt naudas sodus.

Norāde par baterijas simbolo (simbols apakšā):
Sīs simboli var būt attiecotās ar kimiskās vielas simbolu. Tādēļ gadījumā tas ir apzīmēts atbilstoši attiecīgo Direktīvu prasībām, kas pienācības attiecībā uz attiecīgo kimikāliju.
TEMPERATURE RECORDER (OPTION)

The chamber temperature can be recorded and checked by installing an optional temperature recorder (MTR-G3504, MTR-0621LH, or MTR-4015LH).

Contact our sales representative or agent for the purchase of temperature recorder.

<table>
<thead>
<tr>
<th>Main specifications of temperature recorder</th>
</tr>

</tr>
<tr>
<td>MTR-4015LH Freezer</td>
</tr>
</tbody>
</table>

For the installation of temperature recorder MTR-G3504, optional recorder mounting bracket MPR-S7 is necessary.

For the installation of temperature recorder MTR-0621LH or MTR-4015LH, optional recorder mounting bracket MPR-S30 is necessary.

BATTERY KIT FOR POWER FAILURE ALARM (OPTION)

It is recommended to install an optional battery kit for power failure alarm (MPR-48B2) to prevent the rise of chamber temperature in the case of power failure. At the power failure, the alarm activates to prompt an action for preventing the storage items.

Contact our sales representative or agent for the purchase of battery kit for power failure alarm.

INTERFACE BOARD (OPTION)

Two kinds of interface board are available as an optional component. MTR-480 has a connector for RS232C and a connector for RS485. MTR-L03 has a connector for LAN.

The interface board (MTR-480) and interface board (MTR-L03) cannot be used at the same time.

Contact our sales representative or agent for the purchase of interface board.

CONTAINERS FOR FREEZER (OPTION)

The containers (MPR-45FSC) can be installed on the shelves in the freezer to store the items. Up to four containers can be accommodated.

Contact our sales representative or agent for the purchase of containers for freezer.
ADDITIONAL SHELF KIT FOR FREEZER (OPTION)

The additional shelf kit (MPR-450ST) for freezer is available to freeze the ice packs efficiently. The shelves can be installed in the right and left freezer.

♦ Contact our sales representative or agent for the purchase of additional shelf kit for freezer.

LIGHT SHIELDING PLATE (OPTION)

It is recommended to install the light shielding plate (MPR-45BP) when storing the photosensitive product in the refrigerator of MPR-450FH.

♦ Contact our sales representative or agent for the purchase of light shielding plate.
## SPECIFICATIONS

<table>
<thead>
<tr>
<th>Product name</th>
<th>Pharmaceutical refrigerator</th>

</thead>
<tbody>
<tr>
<td></td>
<td>MPR-N450FSH</td>
</tr>
<tr>
<td>External dimensions</td>
<td>W800 mm x D640 mm x H1810 mm</td>
</tr>
<tr>
<td>Internal dimensions</td>
<td>W720 mm x D516 mm x H913 mm (refrigerator)</td>
</tr>
<tr>
<td></td>
<td>W680 mm x D470 mm x H415 mm (freezer)</td>
</tr>
<tr>
<td>Effective capacity</td>
<td>326 L (refrigerator), 136 L (freezer)</td>
</tr>
<tr>
<td>Exterior</td>
<td>Colored steel</td>
</tr>
<tr>
<td>Interior</td>
<td>Vacuum molding (ABS resin) (refrigerator)</td>
</tr>
<tr>
<td></td>
<td>Painted steel (freezer)</td>
</tr>
<tr>
<td>Door</td>
<td>Painted steel without glass window x 2 (refrigerator)</td>

<tr>
<td>Insulation</td>
<td>Rigid polyurethane foamed-in place</td>
</tr>
<tr>
<td>Shelf</td>
<td>Tempered glass x 3, Allowable load; 25 kg/shelf (refrigerator)</td>
</tr>
<tr>
<td></td>
<td>Hard steel wire on polyethylene coating x 2, Allowable load; 15 kg/shelf (freezer)</td>
</tr>
<tr>
<td>Bottom shelf</td>
<td>Hard steel wire on polyethylene coating x 2 (freezer)</td>
</tr>
<tr>
<td>Access port</td>
<td>Inner diameter; 30 mm, 2 locations (back of refrigerator and freezer)</td>
</tr>
<tr>
<td>Cooling method</td>
<td>Forced cool air circulation (refrigerator), Direct cooling (freezer)</td>
</tr>
<tr>
<td>Compressor</td>
<td>Inverter type, Output; 120 W (refrigerator)</td>
</tr>
<tr>
<td></td>
<td>Hermetic type, Output; 170 W (freezer)</td>
</tr>
<tr>
<td>Evaporator</td>
<td>Fin and tube type (refrigerator), Tube on sheet type (freezer)</td>
</tr>
<tr>
<td>Condenser</td>
<td>Skin condenser (refrigerator, freezer)</td>
</tr>
<tr>
<td>Refrigerant</td>
<td>R-600a (refrigerator), R-290 (freezer)</td>
</tr>
<tr>
<td>Defrosting</td>
<td>Cycle defrost + forced defrost (refrigerator)</td>
</tr>
<tr>
<td></td>
<td>Natural defrost by stopping operation (Freezer)</td>

Safety check sheet

1. Unit contents:
   - Risk of infection: □Yes □No
   - Risk of toxicity: □Yes □No
   - Risk from radioactive sources: □Yes □No

   (List all potentially hazardous materials that have been stored in this unit.)
   Notes:

2. Contamination of the unit:
   - Unit interior:
     - No contamination: □Yes □No
     - Decontaminated: □Yes □No
     - Contaminated: □Yes □No
     - Others:

3. Instructions for safe repair/maintenance/disposal of the unit
   a) The unit is safe to work on □Yes □No
   b) There is some danger (see below) □Yes □No
   Procedure to be adhered to in order to reduce safety risk indicated in b) below.
